

RISKIQ Risk Assessment & Analysis for Construction

An effective Strategic Risk Management strategy engages stakeholders from the construction site to the board room and creates a common cause in an ongoing effort to protect your organization. Organizations who are willing to understand their risk and proactively manage it will have peace of mind knowing they are doing everything they can to protect their organization.

Completing the Analysis

Assessing risk across an entire organization is no small task. IMA's tool can help engage the most expert members of an organization to complete the risk modules to evaluate specific areas of the most critical risk or take a more holistic approach and evaluate all risk areas at once.

Risk Assessment for:

Click a category to assess, then "Next". We recommend clicking one category at a time to assess. At the end of each, you'll be directed back to this page to unclick the category you just assessed, and click another category.

Auto Liability

Builders Risk

General Liability
